

Topic: Customer Intelligence & Sales Growth Forecasting

Duration: 5 Minutes

Core Theme: Turning Raw Sales Data into Customer Insights & Revenue Predictions

Executive Summary: Focuses on customer RFM segmentation (Champions vs. At-Risk), predictive sales forecasting to plan inventory, and tracking product profit margins to maximize profitability.

1. Business Features & Connectivity

Feature Name	What It Does (Business Function)	How It Connects	Business Value & ROI
Customer RFM Segmentation	Categorizing buyers into distinct behavioral segments (Champions, Loyal Customers, Potential Loyalists, At-Risk, and Lost Customers) based on Recency, Frequency, and Monetary value.	Uses clean transaction data to drive targeted marketing and retention strategies.	Increases customer retention by identifying valuable buyers and alerting teams to churn risks before customers leave.
Predictive Sales Forecasting	Smart predictive models that analyze historical sales patterns to project future revenue, seasonal spikes, and demand shifts.	Links sales performance history to future inventory planning and target setting.	Prevents revenue loss from stockouts and avoids over-budgeting by giving leaders an accurate view of future sales trends.
Profitability & Inventory Health Tracking	Real-time monitoring of product margins, stock velocity, and overall inventory turnover.	Connects customer demand predictions with supply chain logistics.	Protects profit margins, reduces holding costs, and ensures high-demand products remain fully stocked.

2. Slide-by-Slide Presentation Guide & Spoken Script

Slide 1: Customer RFM Segmentation Matrix

Visual Display (Live App): Customer RFM Segment Distribution (112 Champions, 42 At-Risk)

Key Presentation Points:

- **Behavioral Segmentation:** Categorizing buyers by Recency, Frequency, and Monetary value
- **112 High-Value Champions:** Identifying top 10% customers generating 40% of revenue
- **42 At-Risk Accounts:** Proactive churn alerts to trigger retention campaigns

Spoken Presentation Script (Non-Technical):

"Thank you Person 2. Raw sales numbers tell us how much revenue came in, but customer analytics tell us WHO is spending and WHY. As seen on our Customer RFM dashboard, Stratify AI automatically groups customers into behavioral segments. We can instantly pinpoint our 112 High-Value Champions driving core revenue, as well as 42 At-Risk accounts that require win-back offers."

Business Takeaway: RFM segmentation transforms generic customer lists into targeted revenue retention strategies.

Slide 2: Predictive Sales & Revenue Forecasting

Visual Display (Live App): Prophet & XGBoost Multi-Horizon Forecasting Chart (95.0% Confidence)

- Key Presentation Points:**
- **Multi-Horizon Predictions:** 30, 60, 90, and 180-day revenue projections
 - **High Model Accuracy:** 4.2% MAPE error rate with 95% confidence intervals
 - **Demand Spike Planning:** Helping store managers align staffing and stock replenishment

Spoken Presentation Script (Non-Technical):

"Beyond understanding past purchases, business leaders need to look forward. As shown in our ML Predictive Forecasting view, our Prophet and XGBoost models project revenue with 95% confidence intervals and an impressive 4.2% MAPE accuracy. This allows store managers to anticipate demand spikes and schedule inventory orders with precision."

Business Takeaway: Predictive forecasting turns reactive planning into proactive revenue management.

Slide 3: Inventory Health & Margin Protection

Visual Display (Live App): Multi-Horizon Forecast Controls & Model Parameters

Key Presentation Points:

- **Stock Velocity Tracking:** Differentiating fast-moving SKUs from slow-moving inventory
- **Stockout Prevention:** Automated reorder triggers for high-margin product lines
- **Margin Protection:** Balancing holding costs with maximum gross profit margin

Spoken Presentation Script (Non-Technical):

"Finally, we connect customer demand to inventory health. High sales mean nothing if profit margins are eroded by excess warehousing costs or stockouts. Stratify AI continuously monitors stock levels and profit margins across all categories, flagging products that need reordering. Let's hand over to Person 4 to see how all these insights are presented live on our executive dashboard."

Business Takeaway: Inventory intelligence balances stock availability with maximum gross profit margin.

3. Speaker Hand-off & Transition Script

Transition Words to Next Speaker:

"Now that we've seen how clean data transforms into customer insights and sales forecasts, let's pass to Person 4 to experience our interactive, real-time Executive Control Center."
